Digit2Me - Digital mentoring for young people with disabilities in rural area

NEWSLETTER #1

DECEMBER 2024

"DIGIT2ME" PROJECT

Greetings from the Digit2Me Project Team! We are thrilled to present the results of the first phase of this exciting project to you!

The Digit2Me project aims to support vulnerable young people in rural areas by mentoring them through digital tools, fostering their inclusion in their rural communities, and promoting their full personal development. To achieve this goal, we will enhance skills in digital mentoring through a MOOC specially designed for youth workers or anyone aspiring to became a digital mentor.

THE FIRST ONLINE AND TRANSNATIONAL MEETINGS

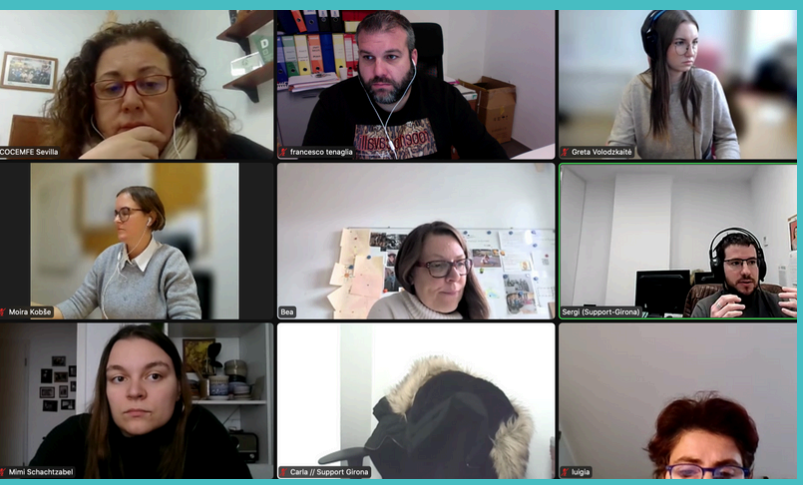

We celebrated many online coordination meetings and two transnational meetings: the first in Sevilla (Spain), home of the lead partner Cocemfe Sevilla, and the second in Weimar (Germany). All project activities were presented at the first meeting and are now being continuously developed and updated!

Co-funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Co-funded by

Digit2Me project aims to:
• Create a comprehensive curriculum and other pedagogical tools for digital mentoring for vulnerable young people living in rural areas.
• Promote their social inclusion and transition to independent living as active members of the ruralcommunities where they live, having in mind, the most vulnerable group among them; young people with disabilities(YPD).
• Address some of the challenges that YPD face in rural areas, such as limited access to education and employment
ACTIVITIES
• Curriculum on digital mentoring including training programs:
➢ for youth professionals, trainers and young mentors
➢ for mentees
➢ on soft skills for independent living (including those for social entrepreneurship)
• MOOC and other digital pedagogical tools on the created curriculum
• Virtual seminars and f2f trainings for future mentors and focused on practical issues on digital mentoring
• Pilot implementation of digital mentoring with vulnerable young people at rural & policy recommendations

FOCUS GROUPS

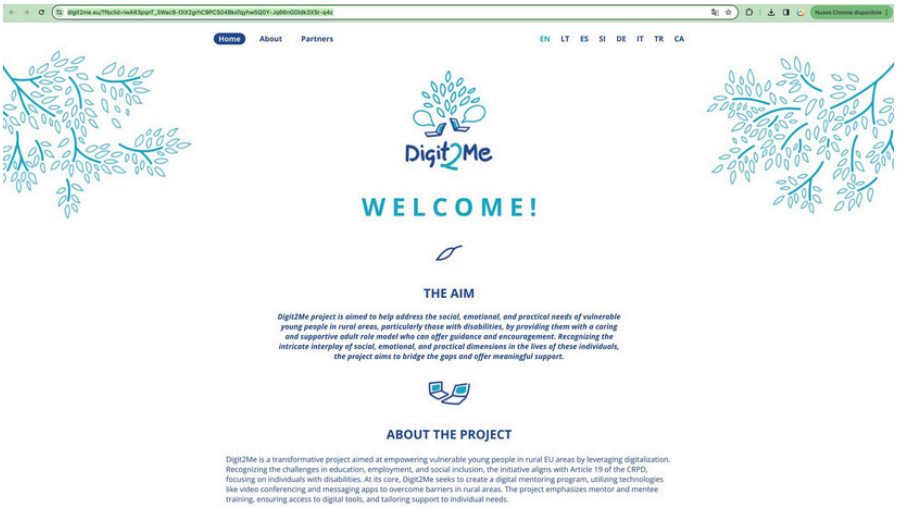

All project partners conducted focus groups in their respective countries, involving professionals and mentors. The goal was to identify the specific needs of our target group (both mentors and mentees), as well as best practices and effective methodologies that can be successfully applied during the learning course.

LTT in GIRONA

Project participants will meet again in April 2025 in Girona, for the celebration of a transnational training workshop for young mentors and professionals from project partners working with YPD, which will enable them to improve digital mentoring skills and capacities and offer comprehensive support for independent living to vulnerable youth in rural areas. This LTT will be organised in 4 training days (20 hours) in Girona, Spain, and will be coordinated by LEB and SUPPORT Girona.

PROJECT PARTNERS

The partnership consists of 7 partners in 6 EU countries: Spain, Slovenia, Germany, Italy, Lithuania, and Turkey, and is following the goal of the widest possible geographical representation to strengthen the all-European approach to guarantee mainstreaming of project results to different parts of EU.

The organisations involved include educators and learners facing barriers to social inclusion in rural areas, where there is often a lack of resources and digital solutions for young people with fewer opportunities.
